

Position Available

Warehouseman / Forklift Operator

JOB SUMMARY

Provides outside assistance to customers by loading building materials in customer's vehicles. The Warehouseman is responsible for handling building materials stock as it arrives or departs the storage areas.

DUTIES AND RESPONSIBILITIES

- Load building materials into customer's vehicles.
- Provide superior customer service by communicating effectively, accurately, promptly, and politely with customers.
- Accurately manage building materials inventory, which includes counting stock, taking inventory, palletizing outgoing shipments, receiving inbound product, and transferring material from one pallet to another.
- Operate fork trucks with capacities of 6,000 pounds or more safely and efficiently.
- Operate end loaders with two-cubic yard capacities or more safely and efficiently.
- Interpret product labels and be technically familiar with building material products. Accurately interpret sales tickets and understand product descriptions.
- Other duties may include sweeping, shoveling, cleaning the warehouse or yard, painting, cutting re-rod and steel lintels, and repairing fire hydrants.
- May be assigned additional tasks and duties by management.

REQUIREMENTS (KNOWLEDGE, SKILLS, ABILITIES)

- Valid state driver's license.
- Minimum two years of work experience, with construction-related experience preferred.
- Demonstrated ability to effectively communicate with customers.
- Demonstrated familiarity with concrete products and their applications, such as patching material, sealers, forming systems, and decorative-concrete materials, is a plus.
- Be able to lift and carry products weighing up to 100 pounds.
- Work effectively as a team with co-workers and customers.
- Uses effective written and oral communication skills.
